Jeff,

Approved the fish screen design. He had comments on a few things that I neglected to include in my submittal to him, but will be part of the design and O&M plan. He noted that I do not need to resubmit, just include them.

Joey

Thank you for the comments Jeff. Those are oversights on my part. We do have a meter at the pump that will be used to regulate flows as well as meters at each irrigation service/property with water

rights.

Joey

Hi Joey,

Thanks for providing the engineering report for the Highland Ditch Screen. Please see the attached memo for comments. None of the comments rise to the level of needing resubmission, provided there is no disagreement with the requested changes.

Thanks again for the opportunity to comment.

Take care,
Jeff
